Skills

HTML, CSS, Javascript , React Js, Redux Toolkit, Node Js (basics), Express Js(basics), NextJs (basics), Git and Github

Experience

UI / React js Developer

Resourceone IT solutions • Hyderabad
06/2022 - 04/2026

Frontend Developer with 3.8 years of experience in designing and developing responsive, scalable, and user-friendly web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Strong expertise in building reusable components, implementing React Hooks, managing state efficiently, and integrating RESTful APIs. Experienced in optimizing performance, improving UI/UX, and ensuring cross-browser compatibility. Adept at working in Agile environments, collaborating with cross-functional teams, and delivering high-quality, maintainable code.

Projects

US Banking Application

Developed a secure and scalable web-based banking application that enables users to manage accounts, monitor balances, transfer funds, and view transaction history in real time. Designed and implemented responsive and reusable UI components using React, ensuring seamless user experience across desktop and mobile devices.

Integrated RESTful APIs for real-time banking operations, authentication, and transaction management. Implemented features such as user login, account dashboard, fund transfers, transaction filtering, and beneficiary management. Used state management techniques to efficiently handle application data and improve performance.

FedEx Shipping & Tracking Application – Support Developer

Provided application support and maintenance for a large-scale shipment tracking and logistics management system developed using React, JavaScript, HTML5, and CSS3. Worked closely with cross-functional teams to ensure smooth functioning of shipment tracking, package status updates, and delivery management features used by customers and internal operations teams.

Monitored application performance and analyzed production issues to maintain high system availability and reliability. Investigated and resolved frontend bugs, UI inconsistencies, and API integration issues to improve overall user experience.

and application stability. Assisted in debugging real-time shipment tracking problems and ensured accurate delivery status updates across different modules.

Real-Time Chat Application (MERN Stack)

Developed a full-stack real-time chat application using the MERN stack including React, Node.js, Express.js, MongoDB, and Socket.IO to enable seamless instant messaging and live communication between users.

Designed and implemented responsive and interactive user interfaces using React.js, allowing users to send and receive messages in real time without refreshing the page. Integrated Socket.IO to establish bidirectional communication between client and server for instant message delivery, typing indicators, and live online/offline user status updates.

Key Features:

- Real-time instant messaging using Socket.IO
- Secure user authentication and authorization
- Live online/offline user status
- Responsive UI for desktop and mobile devices
- Chat history and message persistence
- REST API integration
- Dynamic and reusable React components
