Hyderabad

Summary

Frontend Developer with 3.10 year of experience building scalable and responsive web applications using **React.js, Redux Toolkit, and REST APIs**. Proficient in JavaScript, component-based architecture, and performance optimization using React Hooks. Strong understanding of Git. Focused on writing clean, maintainable, and efficient code.

Technologies

FRONTEND TECHNOLOGIES

React.js, **TypeScript**, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, React Router, Bootstrap, Responsive Web Design, Axios

BACKEND TECHNOLOGIES (Basics)

Node.js, Express.js, REST APIs, MongoDB, Mongoose

TOOLS & PLATFORMS

Git, GitHub, VS Code, Postman, Agile/Scrum Methodology, npm, Webpack, Vite, Chrome DevTools, CI/CD

Experience

UI / React js Developer

Resourceone IT solutions from june 2022 to April 2026 | Hyderabad

Frontend Developer with 3.10 years of experience in designing and developing responsive, scalable, and user-friendly web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Strong expertise in building reusable components, implementing React Hooks, managing state efficiently, and integrating RESTful APIs. Experienced in optimizing performance, improving UI/UX, and ensuring cross-browser compatibility. Adept at working in Agile environments, collaborating with cross-functional teams, and delivering high-quality, maintainable code.

Projects

▣ US Banking Application

Duration: Feb 2023 – Nov 2023

Technologies: React.js, JavaScript, HTML5, CSS3, Redux Toolkit, REST APIs, Git

Responsibilities & Contributions:

- Developed a secure and responsive banking application for account management, fund transfers, and transaction tracking.
- Designed and implemented reusable React components to improve maintainability and scalability.
- Integrated RESTful APIs for user authentication, account operations, and transaction processing.
- Built key modules including Login, Account Dashboard, Beneficiary Management, Fund Transfer, and Transaction History.
- Implemented Redux Toolkit for centralized state management and efficient data handling.
- Developed form validation and error-handling mechanisms to ensure secure and accurate transaction processing.
- Implemented role-based access control (RBAC) to manage user permissions and secure sensitive banking operations.
- Enhanced application performance through code optimization and component reusability.
- Collaborated closely with backend teams to ensure seamless API integration and data consistency.

▣ FedEx Shipping & Tracking Application (Support Developer)

Duration: Jan 2024 – Jul 2024

Technologies: React.js, JavaScript, HTML5, CSS3, REST APIs, Git, Jira

Responsibilities & Contributions:

- Provided application support and maintenance for a shipment tracking and logistics management platform.
- Monitored production environments and resolved application issues to maintain system stability and availability.
- Investigated and fixed frontend defects, UI inconsistencies, and API integration-related issues.
- Supported shipment tracking, package status updates, delivery scheduling, and logistics workflows.
- Analyzed application logs and collaborated with cross-functional teams to identify root causes of production incidents.
- Assisted in troubleshooting customer-reported issues and ensured timely incident resolution.
- Participated in release management, deployment activities, and post-release validation processes.
- Utilized Jira for incident tracking, defect management, and project collaboration.
- Performed root cause analysis (RCA) for recurring issues and implemented preventive measures.

▣ Real-Time Chat Application (MERN Stack)

Duration: Aug 2024 – Oct 2024

GitHub: <https://github.com/Govardhan0020/MernchatApp>

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.IO, JavaScript, HTML5, CSS3, Git

Responsibilities & Contributions:

- Developed a full-stack real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented real-time messaging functionality using Socket.IO for instant communication between users.
- Designed and developed secure user authentication and authorization using JWT tokens.
- Created responsive and reusable React components for an optimized user experience across devices.
- Developed one-to-one messaging functionality with real-time message delivery.
- Implemented online/offline user status indicators and typing notifications.
- Built chat history persistence using MongoDB to store and retrieve conversations efficiently.
- Integrated REST APIs for user management, authentication, and message operations.
- Utilized React Hooks for state management and component lifecycle handling.

Education

Bachelor of Science (B.Sc.) in Electronics

Sri Krishnadevaraya University, Anantapur, Andhra Pradesh

Percentage: 86%

Graduated: November 2021
